HTML, CSS, JavaScript, jQuery, Bootstrap, Handlebars, Ruby on Rails, Express.js, Node.js, MongoDB, PostgreSQL

General Assembly July 2017 - October 2017

Completed a 13-week, full-time immersive program with 600+ hours learning full stack web development

Tic Tac Toe

Classic two player game of Tic Tac Toe complete with game logic to determine win/lose/tie developed using JavaScript, HTML, jQuery, and Sass.

Nerd Blog

A place where people can come read about things revolving around nerd interests. Developed with JavaScript, jQuery, HTML, CSS, Bootstrap, Express, Ruby on Rails and PostgreSQL.

Funventory

The app is an inventory management system for a retailer to keep track of inventory. Collaborated in a team to implement agile development. Created with MongoDB, Express, JavaScript, jQuery, and Handlebars.

One Rep Max Track

This site tracks a person's strength. For each section you enter in the most weight you can lift in one repetition and also a personal note so you have a benchmark of where you were the last time you tested yourself. Developed using JavaScript, jQuery, CSS, Bootstrap, Handlebars, Ruby on Rails and PostgreSQL.

Fallon Health / Navigator February 2013 - July 2017

Collaborated with Nurse Case Manager, Geriatric Support Service Coordinator, Primary Care Provider and vendors to support members remaining safe and independent in the community.

University of Rhode Island / Communications B.A.
